

[BIO & MEDICAL KOREA] Regeron's 'Pristeen-Claire' Reinforces Skin's Regenerative Ability

Regeron (www.regeron.com) Introduces 'Pristeen-Claire' that Reinforces the Skin's Regenerative Ability, participating in the 'BIO & MEDICAL KOREA 2014' that has opened in KINTEX from May 28 (Wed) to 30(Fri).

The 'Pristeen-Claire' line, as a product that contains a Regeron's unique patented component 'Sh-Pp Complex' (Stimulated activation of the skin's root cell), that normalizes excessive sebum secretion and minimizes the stimulus factor while aiding the fast recovery of skin texture, it supports in healthy skin by strengthening the skin's regenerative ability.

It is comprised of 4 products, the Cell Revitalizer, Cell Perfection Gel, Cell Fill-up Essence and Cell Revitalizing Cream, and Regeron personally manages from purchasing raw materials to production stages and after production, and it is a product that has been checked for safety through a toxicity active component test.

Combination of the Asia's top Medicine·Bio industry, Herb 'BIO KOREA' and representative of the health care industry 'MEDICAL KOREA', held the 'BIO&MEDICAL KOREA 2014(www.biokorea.org)', embracing all aspects of the health industry from medicine and medical supplies to overseas patients attraction, and health care industry, and it is comprised of diverse programs such as conference, business forum, exhibition, and job fair centered on the main program including farm fair, invest fair, mattech fair, and others.
